SUMMARY

- Master of Science (MS) focused on **Information Technology** & **Software Development**
- **3 years** of experience in IT industry with detailed technical knowledge and hands-on experience in **Automation**, **Application Development** using **Java**, **Java Script**
- Ability to pick up new technologies, solve complex technical problems and multitask between different projects with experience in all phases of **SDLC**

TECHNICAL SKILLS

Languages	: Java, Python, C, C++
Frameworks	: Spring Boot, Hibernate
Web Technologies	: Angular, Node.js, Express.js, HTML5, CSS3, JSON, JavaScript
Database	: My SQL, Mongo DB
Tools/Others	: AWS, Linux, Docker, Kubernetes, Tableau, Kibana, Elastic Search, Logstash, Beats, ALM, Selenium, UFT, Git, GitHub, Jenkins, Maven, Visual Studio Code, IntelliJ IDEA, Eclipse, Slack, Apache Tomcat, Postman, Swagger UI

EDUCATION

Master of Science, Information Technology — **May 2020**
University of North Carolina, Charlotte, NC — **GPA: 4.0/4.0**

Bachelor of Engineering, Information Technology — **May 2015**
VNRVJIET, Hyderabad, India — **GPA: 3.7/4.0**

CERTIFICATION

AWS Certified Solutions Architect – Associate — **Nov 2019**

PROFESSIONAL EXPERIENCE

Software Quality Engineering Intern, Shutterfly Inc — **May 2019 – Dec 2019**
South Carolina, United States

- Implemented & deployed fully functional automation test suite for workflow management cloud-based web applications using **Java**, **Selenium**, **Maven** and **Jenkins** (CI/CD) which helped in reducing the manual testing effort considerably
- Created and executed validation tests post QA/Production deployments for order fulfillment systems using TestRail
- Worked with **cross functional teams** to understand the business process and identify key areas for improvement and optimization of canvas production platform applications
- Improved backend applications performance by implementing API testing using **POSTMAN**

Member Technical, Automatic Data Processing (ADP) — **Jun 2015 – Jul 2018**
Hyderabad, India

- Developed an internal application that creates and monitors business process using Angular as frontend and **Java**, **Spring Boot**, **Rest API**, **Hibernate**, **MySQL** as backend. Used source control tools like **GitHub**, **Git** to effectively manage the code
- Led a team of three and co-ordinated the development efforts to build a detailed and fully automation test suite for Client and Association Engagement Technology team using **Selenium** (Java) in **TestNG** framework
- Planned, monitored and allocated team resources every release (**six-month cycle**) and sprint (**two-week cycle**). Interacted closely in the **AGILE** environment to ensure the high levels of teamwork and quality
- Improved test coverage and overall productivity by **60%** through automated test scripts in **Selenium**, **UFT** tools

ACADEMIC PROJECTS

Student Registration App — **2020**
Designed and implemented REST API for student registration application having CRUD operations using **Angular**, **Node JS**, **Express** and **MongoDB.** Documented the API using **Swagger UI** and deployed in **nginx** server using **Digital Ocean**

Book Trail — **2019**
Developed a content sharing web application which allows users to share book reviews. Users can also manage profile by saving/deleting books and updating feedback. Technologies used are **HTML5**, **CSS3, Node JS**, **Express** and **MongoDB** (**NOSQL**) with **MVC** architecture

Job Monitor — **2018**
Designed an effective dashboard for Continental company which helps users in getting information about different jobs and their details. Used ELK (**Elastic Search**, **Logstash** and **Kibana**) and integrated them to load the data from files and visualize on Kibana. Improved the system for changes of data using **Beats**

Text Mining on 500 MNT News — **2018**
Performed text mining on 500 MNT News data to find human's surprise average rating. Built various data models such as logistic regression (achieved accuracy 72%), Naïve Bayes (accuracy attained 64%) and random forest (accuracy obtained 57%), to acquire which model is the best fit using **Python**
