SUMMARY

- Master of Science (MS) focused on **Information Technology & Software Development**
- **3 years** of experience in IT industry with detailed technical knowledge and hands-on experience in **Automation, Application Development** using **Java, Java Script**
- Ability to pick up new technologies, solve complex technical problems and multitask between different projects with experience in all phases of **SDLC**

TECHNICAL SKILLS

Languages	: Java 8, Java Script (ES6), Type Script, Python, SQL, HTML5
Frameworks	: NodeJS (Express), Angular, CSS3, Spring Boot, Hibernate
Databases	: My SQL, Mongo DB
Tools	: Linux, Git, GitHub, Jenkins, Docker, Kubernetes, Tableau, Kibana, ALM, Selenium, UFT, Maven, Visual Studio Code, IntelliJ IDEA, Eclipse, Slack, Apache Tomcat, Postman, Swagger
Cloud Technologies	: AWS(EC2, S3, ELB, Lambda, API Gateway, Auto Scaling, Cloud Watch), Azure, Digital Ocean

EDUCATION

Master of Science, Information Technology University of North Carolina at Charlotte, Charlotte, NC	May 2020 GPA: 4.0/4.0
Bachelor of Engineering, Information Technology VNR Vignana Jyothi Institute of Engineering and Technology, Hyderabad, India	May 2015 GPA: 3.7/4.0

CERTIFICATION

AWS Certified Solutions Architect – Associate	Nov 2019
--	-----------------

PROFESSIONAL EXPERIENCE

Software Quality Engineering Intern , Shutterfly Inc <i>South Carolina, United States</i>	May 2019 – Dec 2019
---	----------------------------

- Implemented & deployed fully functional automation test suite for workflow management cloud-based web applications using **Java, Selenium, Maven** and **Jenkins** (CI/CD) which helped in reducing the manual testing effort considerably
- Created and executed validation tests post QA/Production deployments for order fulfillment systems using TestRail
- Worked with **cross functional teams** to understand the business process and identify key areas for improvement and optimization of canvas production platform applications
- Improved backend applications performance by implementing API testing using **POSTMAN**

Software Engineer , Automatic Data Processing (ADP) <i>Hyderabad, India</i>	Jun 2015 – Jul 2018
---	----------------------------

- Developed an internal application that creates and monitors business process using Angular as frontend and **Java, Spring Boot, Rest API, Hibernate, MySQL** as backend. Used source control tools like **GitHub, Git** to effectively manage the code
- Led a team of three and co-ordinated the development efforts to build a detailed and fully automation test suite for Client and Association Engagement Technology team using **Selenium** (Java) in **TestNG** framework
- Planned, monitored and allocated team resources every release (**six-month cycle**) and sprint (**two-week cycle**). Interacted closely in the **AGILE** environment to ensure the high levels of teamwork and quality
- Improved test coverage and overall productivity by **60%** through automated test scripts in **Selenium, UFT** tools

ACADEMIC PROJECTS

Event Registration App (Angular 8, Node JS, Express, MongoDB, Swagger, Digital Ocean) Designed and developed REST API for student event registration application having CRUD operations using Angular, Node JS, Express and MongoDB . Documented the API using Swagger UI and deployed in nginx server using Digital Ocean	2020
Movie Hub Portal (Angular 8, Spring MVC, Spring Boot, My SQL, AWS EC2) Developed a web application using Angular and Spring Boot to store and display a list of popular movies. Connected to MySQL database using Spring Data JPA and performed unit testing using Junit framework. Deployed the application on AWS EC2 instance.	2020
Book Trail (HTML5, CSS3, Node JS, Mongo DB) Developed a content sharing web application which allows users to share book reviews. Users can also manage profile by saving/deleting books and updating feedback. Technologies used are HTML5, CSS3, Node JS, Express and MongoDB (NOSQL) with MVC architecture	2019
Dynamic Job Monitor (Kibana, Elastic Search, Logstash) Accomplished a data engineering project sponsored by Continental that will assist employees get information using Kibana. Used ELK (Elastic Search, Logstash and Kibana) and integrated them to load the data from files and visualize on Kibana.	2018
