TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6), TypeScript, SQL

Frontend: Vue.js, React, HTML5, CSS3

Backend: FastAPI, Node.js/Express, REST APIs, Spring Boot

Databases: MySQL, MariaDB, MongoDB

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Jenkins, CI/CD

Tools: Git, GitHub, GitHub Copilot, Linux, Jira, Confluence, Postman, Swagger, Selenium, Cypress, Kibana

Architecture & Practices: SPA Architecture, API Design, Agile/Scrum, Test Automation

AI & LLM Technologies: ChatGPT, Claude, GitHub Copilot, Prompt Engineering, RAG, MCP

PROFESSIONAL EXPERIENCE

Senior Software Engineer, NetApp Inc

July 2020 – Present

California, United States

- Led consolidation of internal test portability platforms into a unified shared infrastructure by redesigning core business logic and workflows, improving infrastructure resource utilization by 40% and reducing operational costs.
- Drove the modernization of an internal platform by transitioning from a legacy Mason Perl-based architecture to a modern Vue 3 frontend and FastAPI backend SPA, enhancing user experience, reducing load times, and cutting deployment time to under 3 minutes.
- Architected and implemented key APIs and services for platform modernization, replacing legacy calls with reusable integrations and improving maintainability.
- Delivered features aligned with evolving operational requirements and resolved priority issues across multiple internal applications, improving reliability and end-user productivity.
- Led migration of internal workflow tracking processes from BURT to JIRA for multiple platform management applications, streamlining issue tracking, improving cross-team operational visibility, and driving adoption across 500+ engineers through technical talks, documentation, and engineering enablement.
- Developed automated test frameworks for shared internal services using Nightwatch.js, Jenkins, and Docker, improving test execution efficiency, deployment reliability, and overall system stability.
- Mentored 7 engineers and contractors on platform features and development workflows, providing technical guidance and code reviews that accelerated onboarding and improved team productivity

Software Engineering Intern, Shutterfly Inc

June 2019 – December 2019

South Carolina, United States

- Configured Jenkins to set up CI/CD pipelines for new branches, build automation, plugin management, and version control, improving development efficiency and build reliability.
- Collaborated with developers, testers, and product stakeholders to identify process improvement opportunities for canvas production platform applications.
- Designed and developed an automation suite for a cloud-based management console application using Java and Selenium WebDriver, improving test efficiency and reducing the risk of manual errors.

Member Technical, Automatic Data Processing (ADP)

June 2015 – July 2018

Hyderabad, India

- Developed an internal application for creating and monitoring business processes using Angular, Java, Spring Boot, REST APIs, Hibernate, and MySQL, improving process visibility and operational efficiency.
- Led a team of three engineers and coordinated development efforts to build a data-driven automation framework for the Client and Association Engagement Technology team.
- Planned and allocated team resources across six-month release cycles and two-week Agile sprints to support timely delivery.
- Improved automation coverage and overall productivity by 60% through the development of Selenium- and UFT-based automated scripts.

EDUCATION

Master of Science, Information Technology

University of North Carolina at Charlotte, Charlotte, NC

Bachelor of Engineering, Information Technology

VNR Vignana Jyothi Institute of Engineering and Technology, Hyderabad, India
